**SAVIN CELEBRATES BACK-TO-SCHOOL WITH NEW DIGITAL DUPLICATOR**

*Savin 3180DNP Offers Exceptional Ease of Use and Cost-Saving Features*

**West Caldwell, NJ, August 15, 2006** – Helping users create quality prints at low cost, Savin, a leading provider of digital office equipment, today launched the Savin 3180DNP Digital Duplicator. With an array of advanced, easy-to-use capabilities, this new digital duplicator produces prints at about one-third of a cent per page.

While suited for any high-volume environment, the Savin 3180DNP is primarily designed to address the varied needs of schoolteachers and administrators. Allowing users to print up to 130 pages per minute (ppm) on a wide variety of paper stock – including construction paper, card stock and NCR paper – the Savin 3180DNP is also equipped with a scanner that can accommodate textbooks as large as 11”x 17”. Moreover, the scanner automatically eliminates unsightly binding margins to produce quality, readable copies.

In addition, optional cost-saving features can enhance the capabilities of the Savin 3180DNP. A quick-changing color drum offers inks in every PMS® color, while an Embedded Controller allows it to print documents from any Windows PC.

To facilitate copying, the Savin 3180DNP features a large, brightly lit multipurpose LCD that guides users through all print jobs. Furthermore, masters can be quickly and neatly disposed of with the Snap Open Master Eject Box – a time-saving feature that will make document management a cleaner, more efficient process in schools.

Savin’s commitment to creating environmentally sound products was an integral component in the design of the Savin 3180DNP. Specifically, this product features Instant Start-Up Technology and an Automatic Shut Off function that will completely shut the unit down

after a user-specified period of inactivity. The Savin 3180DNP also complies with the RoHS directive and the WEEE directive to conserve the environment.

The suggested retail price for the Savin 3180DNP is \$5,420.
