

## Savin SP 6430DN

Outstanding A3 Printer for Mid-Size Workgroups

The Savin SP 6430DN, BLI's Pick for "Outstanding A3 Printer for Mid-Size Workgroups" for the Winter 2016 test season, offers...

- Excellent value, with a purchase price that is among the lowest in its class.
- Ledger-size output in a compact footprint.
- Convenient, time-saving features such as simple routine maintenance and support for the company's Smart Device Print&Scan app.

"The Savin SP 6430DN is the best of both worlds," said Marlene Orr, BLI Director of Office Equipment Product Analysis. "For just a little more than a legal-size printer and for the same compact footprint, the SP 6430DN offers support for ledger-size output. And compared to the small group of ledger-size models in this speed range, the total cost of ownership is far lower than the average. All in all, this device is an outstanding choice for mid-size workgroups that are looking for a versatile yet compact printer."

"The SP 6430DN proved it can keep churning out pages with virtually no downtime, completing our 75,000-page test with only a single misfeed," said Tony Maceri, BLI Senior Test Technician. "Navigating the interface and the print drivers is simple and so are maintenance procedures. Print quality was also very good, so users can trust the device to produce professional-looking output every time."

## About **BLI Pick Awards**

---

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests. Its Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, energy efficiency or value.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
